#Professional Experience

Phoenix Children's Hospital / IT Infrastructure Engineer

June 2018 - Current: Phoenix, AZ

I upgraded 400 nursing phones to latest mobile OS to coincide with upgrade of medical software that required the latest mobile OS to avoid downtimes in patient care

I upgraded the batteries in iPhones that showed poor battery health to prolong life of device saving $10000 in phone upgrades

I create packages and deploy software to endpoints using Microsoft SCCM so that the operations team doesn't spend time installing software individually

I write scripts using PowerShell to automate tasks for login items and active directory user setup

Ewing Irrigation / Systems Administrator

September 2016 – June 2018: Phoenix, AZ

I automated tasks with PowerShell for backing up files and gather user information from Active Directory

I migrated 1200 users from on premises email to a cloud service by communicating with users when this would happen as well as scheduling migrations to run automatically overnight as to not effect work hours

I managed users in a hybrid cloud/on prem setup with IBM Domino and Notes

I designed and updated the company's intranet site using HTML and CSS in IBM XPages

Harkins Theatres / Jr. System Admin

March 2015 - September 2016: Scottsdale, AZ

I used PowerShell to write login scripts and automate user group policies making employee onboarding faster

I led a project to virtualize the server infrastructure at all theatre locations to save space and hardware costs

I worked with developers to deploy a new .NET order and inventory system using IIS and SQL Server 2014

I provided end user support to all the corporate office as well as supported the field team that went on site to theatre locations

AZ Industries for the Blind / IT Specialist

February 2013 - March 2015: Phoenix, AZ

I led a project to update all PC's from Windows XP to Windows 7

I kept physical inventory of IT assets to avoid purchasing unnecessary duplicate items

---

#Education

Grand Canyon University / Incomplete - Bachelor of Science in Computer Programming

January 2016 – April 2018: Phoenix, AZ
